

ONE DAY SURGERY

One Day Surgery or Outpatient Surgery Department is a surgical procedure that doesn't require an overnight stay. Your doctor or surgeon will determine if you need inpatient or outpatient surgery.

Outpatient surgery has many advantages, including the comfort and convenience of recovering in your own home; it eliminates inpatient hospital admission, reduces the amount of medication prescribed, and uses a patient's time more efficiently.

We offer convenient options for same-day surgery as well as thorough education for follow-up care at home. Having your outpatient surgery at Health Shield Medical Center offers you peace of mind knowing you have the support of our comprehensive and skilled team of doctors and nursing staff.

The state-of-the-art operating advancements provided in the newly opened operating suites include cutting-edge technology that provides a live, high resolution imaging feed to the surgical team throughout operation.

The services provided in Health Shield Medical Center Outpatient Surgery Department include:

- Plastic Surgery
- Endoscopy
- General Surgery
- Gynecological Surgery
- Otolaryngological Surgery
- Pain Management

Patients having surgery are usually admitted to the hospital the morning of their surgery or have their surgery as an outpatient.
